AN UNFORGETTABLE JOURNEY WHAT WE CALL LIFE.

*Our Shapes.....
Your Solution*

THE WINDOW ENGINEERS.

A perfect window is a culmination of many things done to perfection.

While most window manufacturers are happy designing windows, we at INNOVATIVE GROUP have taken the art of window-making a notch higher to find the perfect solution for your home. We have turned it into an obsession by looking into the smallest details.

Right from procuring the best quality PVC to converting them into strongest profiles, our attention to details makes sure that nothing is left to chance. So that every window coming out of our factory is nothing short of a work of engineering that lasts for generations.

PROVIDING YOU WITH THE BEST

Innovative uPVC profile are 100% Eco friendly and backed by the superior German manufacturing technology.

The manufacturing facility is equipped with a state - of - the - art extrusion with in Hyderabad and other advanced machinery to deliver the best of the profiles

WHY WINDOWS

BECAUSE LIFE NEEDS A FRONT ROW SEAT

Savour the beauty of the early morning sun as it peeps in to greet you. Feel a fine spray of rain. Float with joy on seeing your child return from school. Life would be less colourful without windows – as you see the world through them. Your very own tranquil space that keeps out noise, dust, heat, cold and rain. Windows lend elegance to your home and let you witness the world around you. No home is complete without them.

FEATURES THAT STAY PERFECT FOR DECADES.

LONG-LASTING STRENGTH

Most uPVC tends to change its colour and property due to sustained exposure to UV radiation. The engineered blend used in VEKA windows is UV stabilised that gives it a long life.

ENERGY-EFFICIENT

The multi-chambered design of INNOVATIVE profiles prevents the transfer of heat inside your house. This makes your house energy efficient by reducing your air-conditioning cost significantly.

HEALTHIER INDOOR AIR QUALITY

The usage of high quality wool pile along with dual layer sealing system in VEKA INNOVATIVE windows prevents dust and pollution from entering your home. This ensures the air inside your home is cleaner and healthier.

SAFE & SECURE

Every INNOVATIVE window is reinforced by a concealed GI section which is designed based on the wind pressure of that region, providing additional strength and stability. Making your home safe and secure.

LEAD-FREE

INNOVATIVE windows are lead-free in line with the global trend to eliminate the use of lead in the construction industry. So, you can be sure about the health of your family.

WEATHERPROOF

The EPDM gasket in INNOVATIVE windows keeps rainwater and wind away from your home, while the impact modifier provides resistance to the window during extreme weather conditions. This makes a VEKA window almost invincible in any kind of weather.

MANUFACTURED TO PERFECTION.

INNOVATIVE GROUP profiles are manufactured in a state-of-the-art manufacturing plant near Hyderabad. The facility is spread over an area of 107640 sqft. with 2 extrusion lines along with lamination and arch-bending facilities where more than 100 employees put in their knowledge, expertise and hard work to manufacture the finest windows.

OUR ENGINEERING TO MEETS YOUR REQUIREMENTS

We at INNOVATIVE GROUP have always strived to offer products that are an epitome of manufacturing excellence. Our facility resonates with the most advanced features while making the uPVC profiles, precision engineering in every meter of uPVC profiles, we conform to the toughest European standards of manufacturing. Our PVC profiles for windows come with a perfect combination of aesthetics and functionality.

OVERALL LOOK

Base it on the architectural design.

TRADITIONAL HOME

Boasts a long, sloping roof to safeguard the home's walls and cope with the heavy monsoon rains.

Displays pillars on walls erected on an elevated plinth, to protect against dampness.

Windows:

- Casement windows on all floors provide both ventilation and views.

MODERN HOME

Showcases a sturdy horizontal design with spacious open floor plans, deliberate asymmetry, and large glass windows or glass walls.

Features more glass everywhere –large windows, balustrades and doors.

Windows:

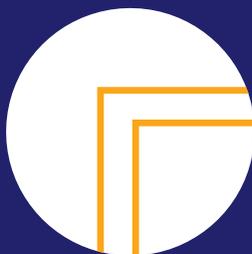

- Large-sized windows.
- Fixed and sliding types.

WHAT TYPE OF WINDOW

BECAUSE EVERY LITTLE DETAIL COUNTS.

Selecting the right window is important to get all functional and aesthetic benefits. A window is an assembly of several important components that function in tandem. The three main components of any window are window frame, glass and hardware.

SLIDING WINDOW

Come with shutters that glide either way to both the left and right, in one frame. Do not take up extra space outside or inside the house. Suitable for rooms, balcony spaces and kitchens

CASEMENT WINDOW

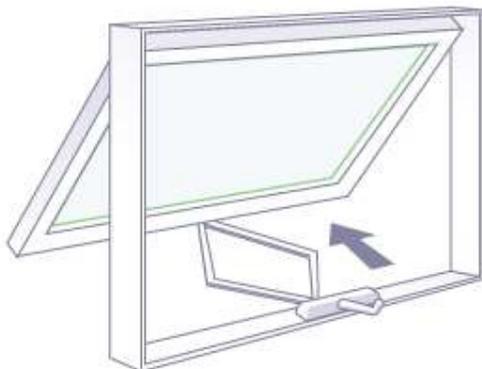

Have shutters that open both ways, as per window type. Enable maximum ventilation and provide superior noise reduction. Suitable for bedrooms, living rooms and bathrooms.

FIXED WINDOW

Are non-openable and fixed on all sides. Let in light and outdoor views, illuminating homes. Ideal for openings where ventilation is not needed and good views are present.

AWNING WINDOWS

Are hinged at the top, and open outwards. Allow excellent ventilation while preventing water ingress during rains. Ideal for ventilating bedrooms, bathrooms and stairwells.

BAY WINDOWS

Are a collection of three or more windows in an angular formation. Transform regular corners inside homes into spaces for relaxation. Suitable for living rooms, and bedrooms, giving luxurious views and comfort.

TILT AND TURN WINDOWS

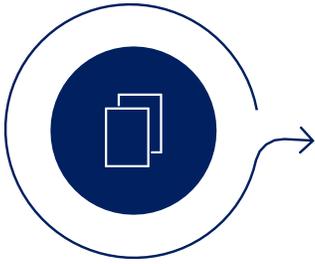

COMBINATION WINDOWS

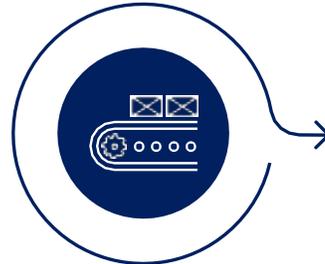

Combine sliding, casement, fixed, awning or tilt-and-turn windows. Allow maximum design flexibility to address specific ventilation or lighting needs. Multiple combinations possible with all types of windows.

Have special hinge mechanism that opens sideways like a casement window, or tilts at the top or bottom. Allow mild ventilation or regular opening as required. Use the tilt mode for constant ventilation in bedrooms & living rooms, and turn mode for higher breeze as required.
